Dear Mr. Berger:

Approval of the Catlow Vapor Mate Assist Inverted Coaxial Hose

You requested California Air Resources Board (CARB) approval of the Catlow Incorporated Vapor Mate Assist inverted coaxial hose on December 27, 1993. The Vapor Mate Assist hose is manufactured by Dayco Products as the Model 7282 Superflex 2000 Plus inverted coaxial hose, and was approved by CARB on November 29, 1993. It is listed in Approval Letter #93-22.

CARB requires the approval of the Division of Occupational Safety and Health, the Office of the State Fire Marshal and the Department of Food and Agriculture, Division of Measurement Standards. The necessary approvals for the Dayco 7282 Superflex 2000 Plus inverted coaxial vapor recovery hose have previously been obtained from these agencies.

Based on the fact that the Catlow Vapor Mate Assist hoses are the same hoses which were certified as the Dayco 7282 Superflex 2000 Plus hoses, I find that their use, when installed in accordance with the manufacturer's instructions, will not adversely affect the performance of vapor recovery systems on which they are installed. Therefore, the Catlow Incorporated Vapor Mate Assist inverted coaxial hoses are certified for use with the Gilbarco VaporVac (Executive Order #G-70-150-AB); Dresser/Wayne WayneVac (Executive Order #G-70-153); and the Hasstech VCP 2/2A (Executive Order #G-70-7-AD) vapor recovery systems.

If you have any questions, please call Basharat Iqbal at (916) 324-7343 or Laura Sullivan McKinney at (916) 327-1525.

Sincerely,

James J. Morgester, Chief
Compliance Division
